Safety-Lancet – The new generation
Safe and easy sampling with increased patient comfort

Safety for both user and patient
• The needle or blade is safely concealed in the lancet body before and after use
• Needlestick injuries and cross-contamination are prevented
• The sterile single-use product cannot be re-used

Easy sampling
• Primed and ready for use
• Secure firing button prevents accidental activation and inactivation of the lancet system
• Ridged lancet body ensures safe grip
• Small contact face for precise puncturing

Patient comfort
• Smooth siliconised blades and triple-sharpened needlepoints to minimise pain
• Defined penetration depths for optimal sampling from adults and children
• No danger of bone injuries due to minimal penetration depths
Safety-Lancet – The new generation

1. Twist the cap until it separates from the Safety-Lancet.

2. Press the Safety-Lancet firmly against the chosen and cleaned puncture site and press the firing button.

3. Dispose of the Safety-Lancet into a sharps container.
